Instructions to CEPA

Grade this test by adding up the scores assigned to each of the business owner's answers. The scores are in small, light colored font to the right of each answer. Generally speaking, the lower the score, the more likely it is that a business owner should sell. The higher the score, the more likely it is that the owner should keep the business, do some formal exit planning, and sell the business at a later time.

Obviously, your final recommendation will depend on a number of factors (and the weighting of those factors) that can not be measured by a simple test. This tool should only be used as a diagnostic tool to highlight issues and facilitate a formal exit planning assessment.
